

RESIDENTIAL VENTILATION

Wall Terminal

Applications

The wall terminal can be used for air supply or air extraction and can be connected directly to the Aerfoam insulated ducts to the ventilation unit.

Advantages

- Direct connection to the Aerfoam insulated pipe system
- Airtight and mechanical connection (no tape required)
- Rain impact-free
- Provided with a mesh
- Residual and aesthetic

Specifications

Application	mechanical ventilation thermodynamic heat pump
Material	metal
Diameter	125 160 180 200
Colour	black
