

UB8 In-Line Plain Tile Vent

Ubbink's UB8 vent is an in-line roof ventilating tile for use in small plain non-interlocking tiles. Designed specifically to merge into the surface of plain tiles without disturbing the roofline. The design features a slotted insect inhibitor to keep out large insects and vermin. UB8 plain tile vents are suitable for both high and low level ventilation and can be installed without batten or tile trimming.

Product features and benefits

- 6,250mm² free vent area
- No batten cutting necessary
- Moulded grill directs ventilation to roof void
- 110mm diameter adaptor available for connection to soil & vent mechanical extraction
- Prevents ingress of birds/vermin and large insects

Application

Suitable for most concrete and clay plain tiles
High or low level roof void ventilation

Dimensions
