

Solar Bird Protection 15cm Kit 30m

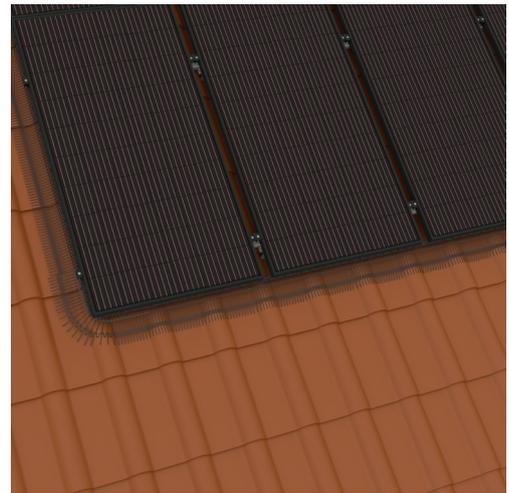

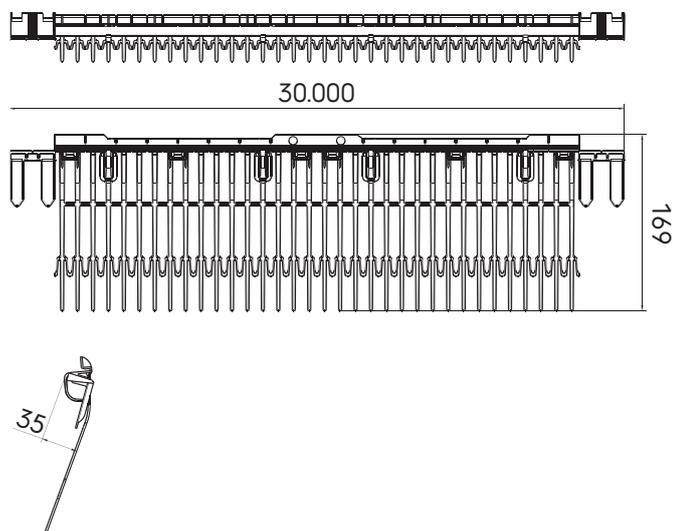

Article number: 711545

Product introduction

The Solar Bird Screen protects your solar panels against external influences. Birds and rodents can pose a risk to roofs and solar panels in on-roof installations. Proper ventilation beneath the solar panels is also essential for optimal performance and long service life. The Solar Bird Screen offers an effective solution. Designed for quick and easy installation, it is compatible with nearly all common solar panel types.

- Prevents birds and rodents from nesting under your solar panels
- Prevents fire hazards caused by inadequate ventilation and damaged cables
- Can be used with nearly every solar PV panel
- Easy and quick installation
