

AIR EXCELLENT

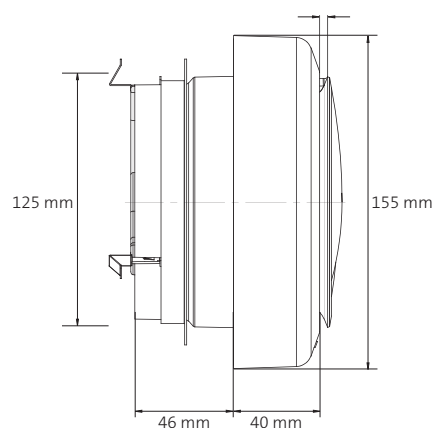

Adjustable supply valve DN125

Features & benefits

- For air supply purposes
- For installation in ceilings and walls
- Easy to adjust
- Easy to remove for cleaning purposes

Adjustable supply valve DN125

For air supply and air extract in ventilation systems you need supply and extract valves. The adjustable supply valve is a plastic valve in RAL9016 white and suitable for applications in habitable rooms, such as living rooms and bedrooms. The valve is equipped with clamps for easy fitting in a valve adaptor.

Supply valve, DN125 (■ = recommended application range)
