

UB37 In-Line Plain Tile Terminal

Introduction

The Ubbink Plain Tile Terminal is an in-line pitched roof terminal for use in small plain non-Interlocking tiles. It is suitable for terminating 110mm diameter mechanical extract systems and soil & vent systems where an external pressure test is not required. For aesthetic purposes, the UB37 terminal matches the UB8 roof ventilating tile

The UB37 has a free vent area of 6,250mm² and a pressure/airflow resistance reading of 11Pa at 100m³/h.

Product features and benefits

- No batten cutting necessary
- 110mm diameter adaptor for connection to soil & vent/ Mechanical extraction

Application

- Suitable for most concrete and clay plain tiles

Material

- Unit - PVC-U
- Adaptor - Styrosun 3600 UV Resistant High Impact Polystyrene

Dimensions

- L: 310mm x W: 330mm

Weight

- 0.95kg per unit
- 9.5kg per box

Product Code

- Terracotta 100130294511
- Anthracite 100130294507
- Red 100130294513
- Sepia 100130294509

Performance

- Provides 6,250mm² free vent area
- The pressure airflow resistance is 43.5 Pascal at 100m³/h

Packaging

- 10 per box
